

## MICROSOFT 365 BACKUP

### With Office 365, data ownership belongs to you

It's easy to perceive that Microsoft is responsible for protecting the long-term retention of your Office 365 data. However, they are only accountable for the infrastructure, simply playing the role of custodian. Processing your data - protecting the data itself is your responsibility.

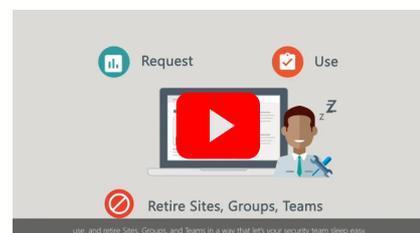

### Why backing up Office 365 is critical

Implementing a Microsoft 365 backup solution protects you against security threats and accidental deletion. Microsoft 365 offers two deletion types.

First, a **soft delete** occurs when emptying the 'deleted items' folder residing in the 'recoverable items' mailbox for 90 days until automatically becoming a hard delete. Alternatively, a **hard delete** occurs when an item is tagged to be purged from the mailbox database completely. Once this happens, it is unrecoverable. The average time from data compromise to discovery is over 140 days, which is too late for retrieval from the recycle bin.

NSP's Microsoft 365 backup nullifies the risk of deletion by providing an unlimited backup of all your email, One Drive, SharePoint and Teams data, with the ability to quickly retrieve a file from backup before it is corrupted or deleted.

## Elements covered by NSP's Office 365 Backup

**Exchange Online:** Mailboxes, Archives, folders, chats, calendars, contacts, messages, permissions.

**SharePoint Online:** Sites, lists, libraries, folders, items, metadata, security settings, version history.

**Microsoft 365 Groups:** Group files, conversations, notebooks, sites.

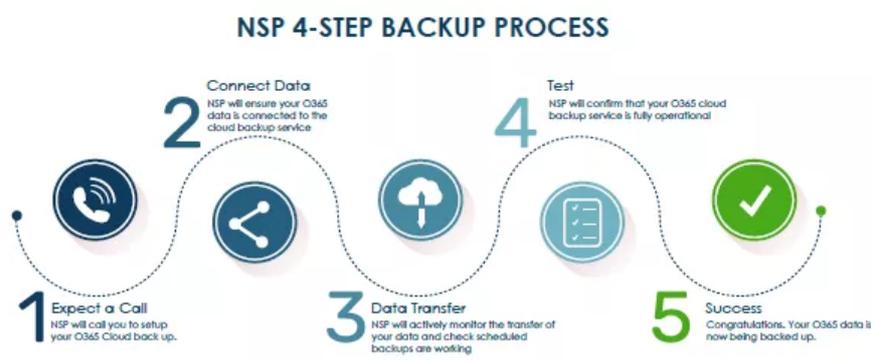

**Microsoft Teams:** Teams channels, private channels, conversations, work files, meeting items.

**OneDrive for Business:** Lists, libraries, folders, items, metadata, security settings, version history.

**Public Folders:** Mailboxes, messages, files, contacts, forms, postings.

**Project Online:** Project plans, jobs, tasks, files.

**Planner:** Tasks, buckets, progress, labels, assignments.

### Benefits

- No administrative burden
- Fully managed architecture
- No additional storage cost
- Self-service recovery console
- Unlimited bandwidth
- No data cap
- 100% uptime guarantee
- Data stored in different location

### Cost Structure

- Per Microsoft 365 licensed mailbox
- No bandwidth fees
- No setup fees
- No storage fees
- No retention policy limitations
- Month-to-month / 1-2-3 year contracts
- SharePoint Online included
- OneDrive for business included

### Tech Specs

- Backup occurs once daily
- Storage quota is unlimited
- Retention policy is unrestricted

### Protecting Against

- Accidental deletion
- Retention policy gaps and confusion
- Internal security threats
- Legal and compliance requirements
- Managing hybrid email deployments and migrations to Microsoft 365
