MEET OUR VCISO

GEORDIE STEWART

Geordie, is an expert in information security, has led security functions for major European organisations. With a master's degree with honors in Information Security from London University and a wealth of technical qualifications, Geordie brings extensive experience in safety-critical information systems. Geordie's track record includes being the lead security consultant on Network Rail's award-winning Intelligent Infrastructure program. He has also served as the European CISO for TUI, a global airline, and tourism brand. For the past four years, Geordie has primarily served as a trusted advisor to European private equity clients, offering expert security advice tailored to the SME market. His focus is on assisting boards in comprehending their information security risks through a steadfast advocacy for a risk-based approach. Geordie emphasizes prioritising key risks and controls that are most pertinent to each business, steering away from compliance-driven checklists.

A renowned international public speaker, Geordie's articles on security metrics, awareness training, supply chain assurance, security monitoring, privacy, and ethics have been widely published.

EXPERIENCE ACROSS INDUSTRIES
